

COSMETIC AND/OR DERMATOLOGICAL PREPARATION AND USE THEREOF IN THE REGULATION OF SKIN CAPILLARY BLOOD FLOW

Abstract of the Disclosure

This invention relates to the field of cosmetology and/or dermatology and concerns a use of preparations that influence indices of blood microcirculation in the skin. Aim of this invention is the use of perfluoride emulsions for essential increase of the skin blood flow and for improving conditions of the blood flow regulatory systems, such as neurogenous and endocrine systems, and for improving adaptive reactions of the skin integument.
